(HealthDay)—The American Pain Society has issued recommendations on the management of postoperative pain. The clinical practice guideline was published in the February issue of the *Journal of Pain*.

Roger Chou, M.D., of the Oregon Health and Science University in Portland, and colleagues, with input from the American Society of Anesthesiologists, convened a multidisciplinary expert panel to develop a [clinical practice guideline](#) for evidence-based, effective, and safer management of postoperative pain in children and adults. The guideline also was reviewed and approved by the American Society for Regional Anesthesia.

The authors conducted a systematic review of the evidence and formulated 32 recommendations for various aspects of postoperative pain management, including preoperative education, perioperative pain management planning, use of different pharmacological and nonpharmacological
