

Higher vitamin D levels may lower breast cancer risk

13 July 2018

(HealthDay)—Higher levels of vitamin D may be protective against breast cancer, according to a study published online June 15 in *PLOS ONE*.

Sharon L. McDonnell, M.P.H., from GrassrootsHealth in Encinitas, Calif., and colleagues examined the relationship between 25-hydroxyvitamin D (25[OH]D concentration and [breast cancer risk](#) across a broad range of 25(OH)D concentrations (
