

Telemedicine visits comparable for glycemic control in T1DM

13 January 2020

(HealthDay)—Among patients with type 1 diabetes and suboptimal glycemic control, replacement of an intermediate face-to-face visit with a telemedicine session did not affect outcomes, according to a study published online Jan. 6 in *Diabetes Care*.

Maria S. Ruiz de Adana, M.D., Ph.D., from the Hospital Regional Universitario de Málaga in Spain, and colleagues randomly assigned 379 [patients](#) with type 1 [diabetes](#) and suboptimal metabolic control (glycated hemoglobin [HbA1c]
