

# Don't delay mammograms, other breast cancer screening

21 October 2020, by From Mayo Clinic News Network

successful because we detect cancers when they're small and treatable, which results in better outcomes for our patients. We don't want to miss that window of opportunity. So, again, if your mammogram has been delayed by the pandemic, please don't wait any longer and come in and get your mammogram done."

Dr. Hunt recommends women start yearly screening mammograms at age 40.

Fewer breast cancers are being diagnosed because of the COVID-19 pandemic. Earlier in the year, when the pandemic began to intensify, many health care institutions suspended their screening programs and weren't offering mammography to patients. This resulted in a nearly 50% drop in new diagnoses of breast cancer, according to a study in *JAMA*.

Fewer people are being diagnosed with [breast cancer](#) because of the COVID-19 pandemic.

Dr. Katie Hunt, a Mayo Clinic radiologist, wants patients to know it's safe and important to resume their regular breast cancer screening.

"If you delayed getting your [screening mammogram](#) because of the pandemic, schedule it now.

"The biggest risk of skipping breast cancer screening is that cancer has more time to grow and potentially progress into a more advanced stage.

"Screening mammography has been incredibly
