

Cannabis to treat gynecological conditions

13 November 2020

64.6%)," states Leo Han, MD, MPH, and coauthors, from Oregon Health & Science University. This difference was statistically significant.

"Coinciding with the increased perception of cannabis safety is the increased national recognition of the dangers of opioid pain medications," says the authors.

"In this study, a large proportion of those women who had never used [cannabis](#) were willing to try it to treat gynecological pain. Fewer, but still a substantial percentage, would use it for procedural pain or other gynecological conditions," says *Journal of Women's Health* Editor-in-Chief Susan G. Kornstein, MD, Executive Director of the Virginia Commonwealth University Institute for Women's Health, Richmond, VA.
